CRF Problem Report

The Scientific and Technical Information Center (STIC) experienced a problem when processing the following computer readable form (CRF):

Application Serial Number: 09/83/	4,307 PCT 09
Filing Date: 5-8	-01
Date Processed by STIC: 6-8-	<u>01</u>
STIC Contact: Mark Spencer, 703-308-4212	
Nature of Problem:	ide
The CRF (was):	
(circle one) Damaged or Unreadable (for	Unreadable, see attached)
Blank (no files on CRF) (see attached)	
Empty file (filename present, but no byte	es in file) (see attached)
Virus-infected. Virus name:	The STIC will not process the CRF
Not saved in ASCII text	6
Sequence Listing was embedded in the fi	ile. According to Sequence Rules, ence Listing.
Did not contain a Sequence Listing. (see	e attached sample)
Other:	The second the second s

PLEASE USE THE CHECKER VERSION 3.0 PROGRAM TO REDUCE ERRORS. SEE BELOW FOR DETAILS:

Checker Version 3.0

The Checker Version 3.0 application is a state-of the-art Windows based software program employing a logical and intuitive user-interface to check whether a sequence listing is in compliance with format and content rules. Checker Version 3.0 works for sequence listings generated for the original version of 37 CFR §§1.821 – 1.825 effective October 1, 1990 (old rules) and the revised version (new rules) effective July 1, 1998 as well as World Intellectual Property Organization (WIPO) Standard ST.25.

Checker Version 3.0 replaces the previous DOS-based version of Checker, and is Y2K-compliant. Checker allows public users to check sequence listings in Computer Readable form (CRF) before submitting them to the United States Patent and Trademark Office (USPTO). Use of Checker prior to filing the sequence listing is expected to result in fewer errored sequence listings, thus saving time and money.

Checker Version 3.0 can be down loaded from the USPTO website at the following address: http://www.uspto.gov/web/offices/pac/checker
